Neo3D Live

The Metaverse for the *most* of us!

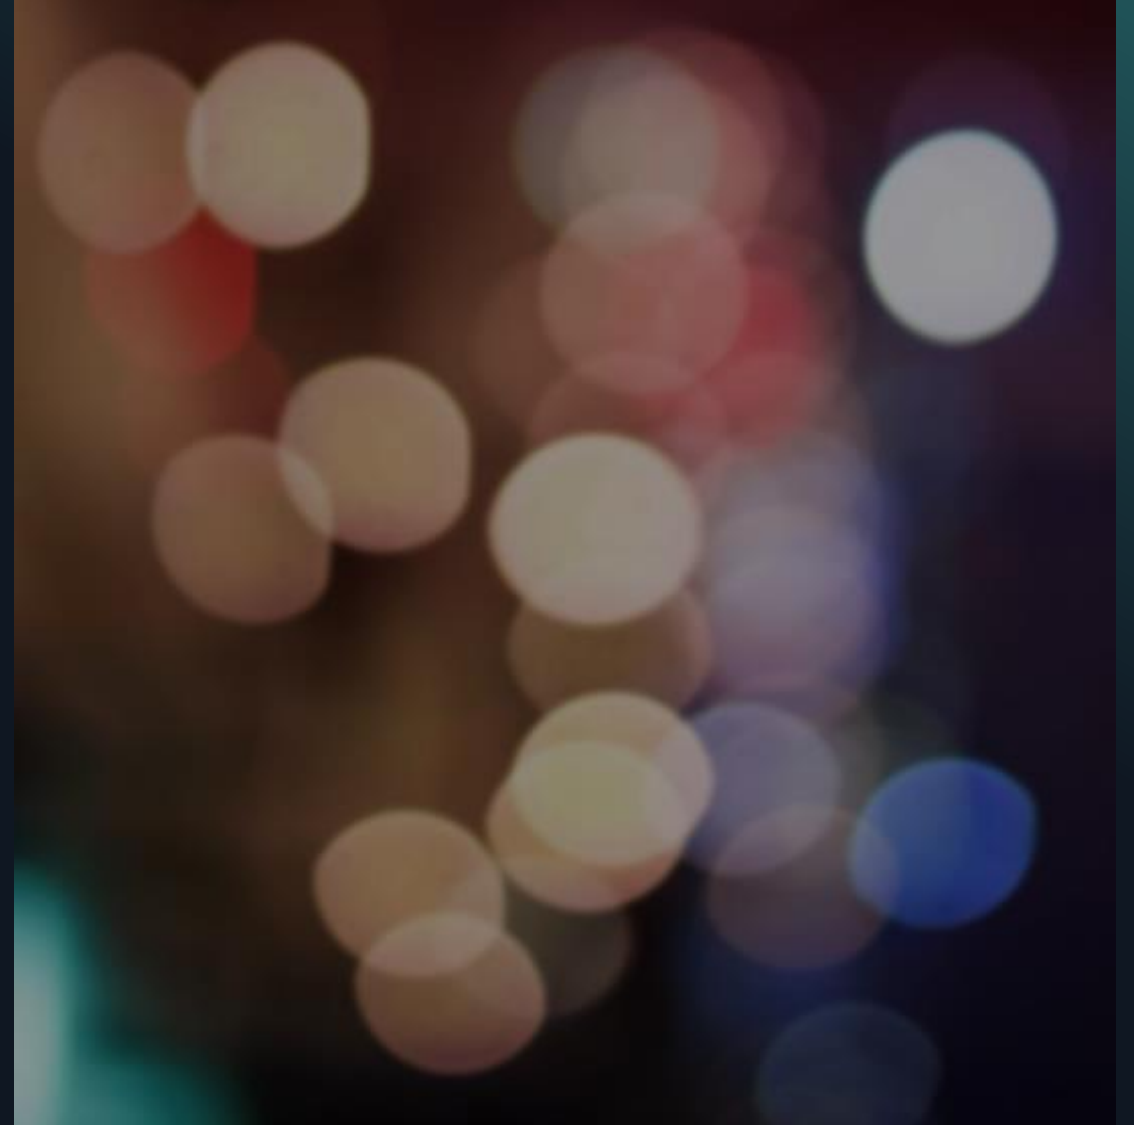

THE PROBLEM

● — A Metaverse for all of us, not just a few!

- Only about 1 percent of Web users have VR gear!
- The big tech companies will target that segment of the population with their deep pockets.
- This leaves a giant opportunity for small, nimble, startups to capitalize on this massive, remaining market segment.

THE SOLUTION

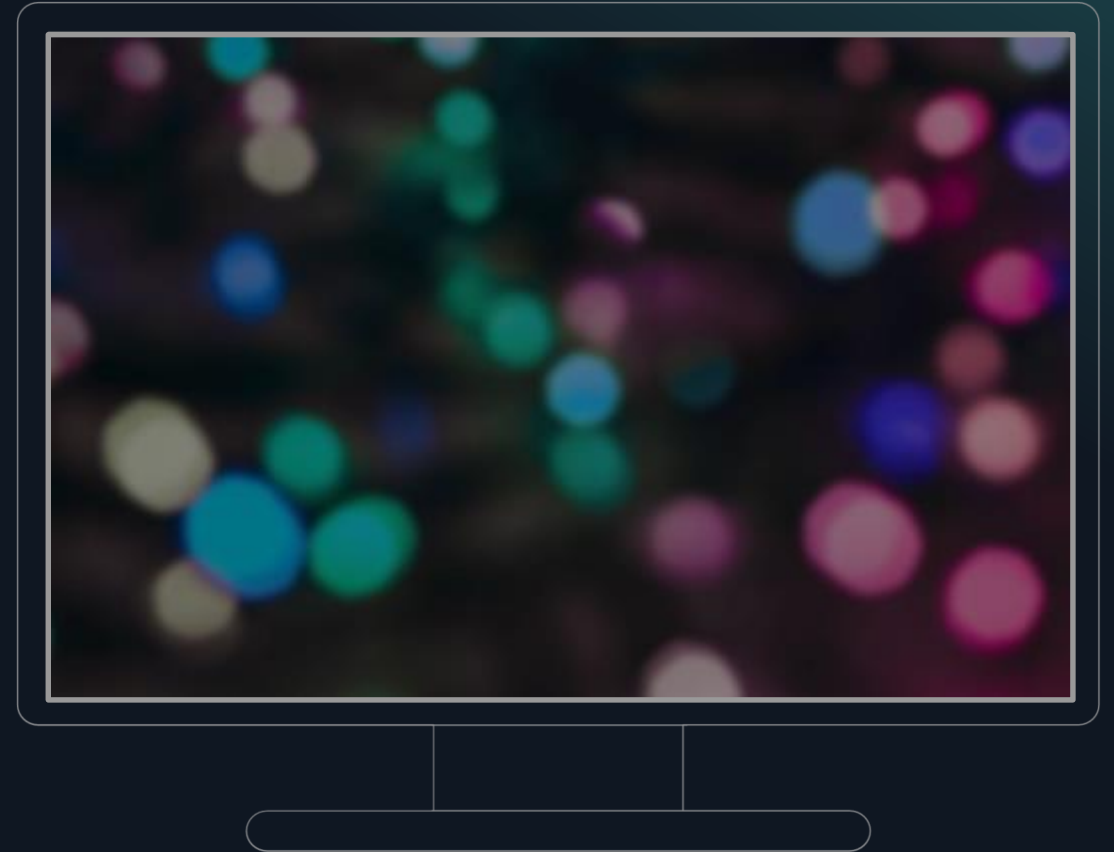

- Create a virtual world toolkit that runs on nearly any browser and device, not just expensive high-power rigs!
- Integrate real-time video conferencing with a 3D virtual world to recreate the social dynamics of a real world marketplace
- Instead of wasting time creating a new crypto platform, leverage the power of the Neo N3 platform with its high TPS & low fees!
- Create virtual employment opportunities to foster adoption
- Capitalize heavily on the NFT phenomenon

THE PRODUCT

Blockchain powered 3D World with integrated video conferencing & no-code Metaverse SDK!

- Neo3D Live is a ThreeJS browser based virtual world that uses the powerful DolbyIO A/V SDK to integrate real-time video conferencing with a true 3D environment
- In the months to come, a no-code, fun drag & drop toolkit will be created that anyone can use to build their own virtual world
- Neo3D Live will also broker goods and services between interested world visitors, and provide virtual real-estate transaction management and property management services for virtual assets

INCOME STREAMS

Potential Revenue Sources

Virtual Land Transactions

- Purchases
- Rentals
- Digital property management services

NFTs

- Commissions from live auction events with virtual auction barkers
- Commissions from NFT showcase worlds in Neo3D Live taken as a percentage of sales

Custom Services

- Fees from the creation of intelligent artificial avatars that provide entertainment for world visitors
- Brokerage fees earned by connecting freelance content designers with virtual land owners

GROWTH STRATEGY

Entice major social media influencers onto the platform via their Superfans who love NFTs!

1 Attract the fans *The Superfan!*

- Offer NFTs to Superfans of influencers if they build a digital shrine in Neo3D Live
- The Superfans then hold parties in Neo3D Live to raise money for the influencer
- The money is held in an escrow in a smart contract for the influencer.

2 Attract the influencers *You've got money!*

- The fans now tell the influencers they have free money waiting for them in Neo3D Live!
- The influencers install a NEO N3 wallet to collect their money
- The smart contract pays the withdrawal fees so the transaction is *totally free* to the influencer!

3 The Network Effect *Feedback loops are fun!*

- The influencer uses their social media power to convince more fans to hold parties in Neo3D Live, now that they believe!
- The fans receive shoutouts, NFTs, and other incentives to hold more parties
- This triggers a chain reaction in platform adoption and growth!
